

KUMMIN – premium outdoor pots

5 products

KUMMIN outdoor pot – 40x40 H40cm

KUMMIN outdoor pot – 50x50 H50cm

KUMMIN outdoor pot – 50x120 H50cm

KUMMIN outdoor pot – 80x80 H40cm

KUMMIN Accessory – Fire pit 80cm

KUMMIN Accessory – Bench 120cm Steel

KUMMIN Accessory – Bench 120cm Wood

KUMMIN Accessory – Wheels 4pcs

USP

Knock-Down delivery

Easy to assemble

Easy to disassemble for winter storage

Long lasting materials

Maintenance free

Modular thinking – Many possibilities

Movable (with wheels / accessory)

KUMMIN – premium outdoor pots

KUMMIN outdoor pot – 40x40 H40cm

- Long lasting material
- Material will turn into a rusty look
- Very good for coastal areas
- Very good for pool areas
- Knock Down construction
- Adjustable feet
- Loose bottom with drainage holes

Art. No.

1401

Materials

Corten steel - 2mm
Adjustable feet - Black

KUMMIN – premium outdoor pots

KUMMIN outdoor pot – 50x50 H50cm

- Long lasting material
- Material will turn into a rusty look
- Very good for coastal areas
- Very good for pool areas
- Knock Down construction
- Adjustable feet
- Loose bottom with drainage holes

Art. No.

1403

Materials

Corten steel - 2mm
Adjustable feet - Black

KUMMIN – premium outdoor pots

KUMMIN outdoor pot – 50x120 H50cm

- Long lasting material
- Material will turn into a rusty look
- Very good for coastal areas
- Very good for pool areas
- Knock Down construction
- Adjustable feet
- Loose bottom with drainage holes

Art. No.

1405

Materials

Corten steel - 2mm
Adjustable feet - Black

KUMMIN – premium outdoor pots

KUMMIN outdoor pot – 80x80 H40cm

- Long lasting material
- Material will turn into a rusty look
- Very good for coastal areas
- Very good for pool areas
- Knock Down construction
- Adjustable feet
- Loose bottom with drainage holes
- Can be used with fire pit accessory

Art. No.

1407

Materials

Corten steel - 2mm
Adjustable feet - Black

KUMMIN – premium outdoor pots

KUMMIN Accessory – Fire pit

- Long lasting material
- Pit material will turn into a rusty look
- Very good for coastal areas
- Very good for pool areas
- To be used with pot 80x80cm

Art. No.

1409

Materials

Corten steel - 3mm
Stainless Steel

KUMMIN – premium outdoor pots

KUMMIN Accessory – Bench 120cm Steel

- Long lasting material
- Material will turn into matt silver
- Very good for coastal areas
- Very good for pool areas
- To be used with 2 pots 40x40cm

Art. No.

1418

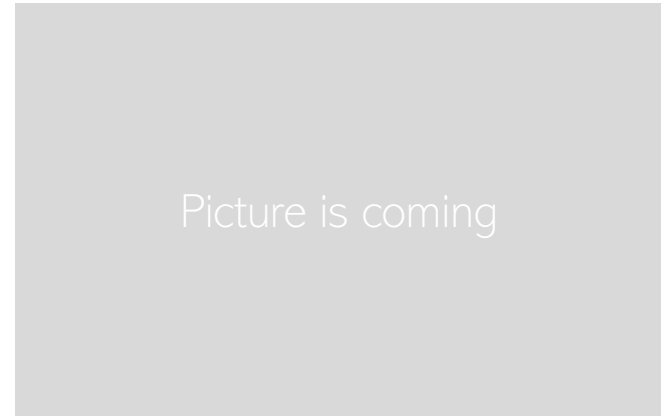

Materials

Corten steel - 3mm

KUMMIN – premium outdoor pots

KUMMIN Accessory – Bench 120cm Wood

- Long lasting material
- To be used with 2 pots 40x40cm

Art. No.

1417

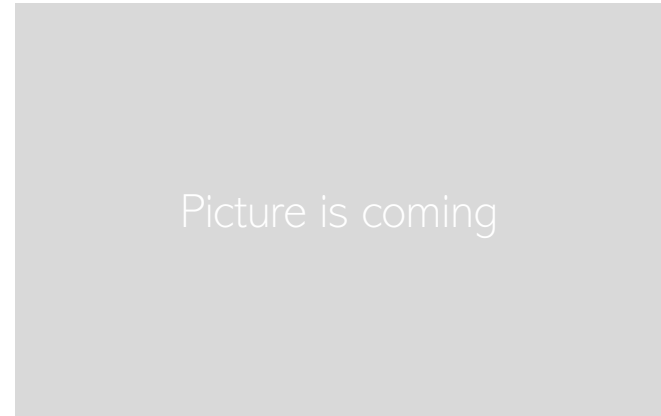

Materials

Black powder coated Corten steel - 3mm
Pine wood – black lacquered

KUMMIN – premium outdoor pots

KUMMIN Accessory – Wheels 4pcs

- Movable pots
- To be used with pots 40/50/80cm
- Replaces adjustable feets

Art. No.

KUMMIN – Corten Material

What is Corten?

This particular type of steel, developed from a group of steel alloys, has specific, enduring properties:

- Cor – refers to the metal's property of corrosion resistance.
- Ten – denotes the metal's tensile strength.

The combination and production of these alloys means the steel produced retains its strength and doesn't need painting because it is corrosion resistant.

Weathering is atmospheric corrosion – literally the effect of being out in all weathers.

The chemical composition of the Cor – ten alloys increases the resulting steel's resistance to atmospheric corrosion. Corten steel is also known as weathering steel.

Instead of corroding, the steel is subject to surface oxidation and develops its own protective film.

Although this layer resembles 'rust' it is in fact a 'controlled' corrosion which is stable, forming a corrective rather than damaging layer across the metal.

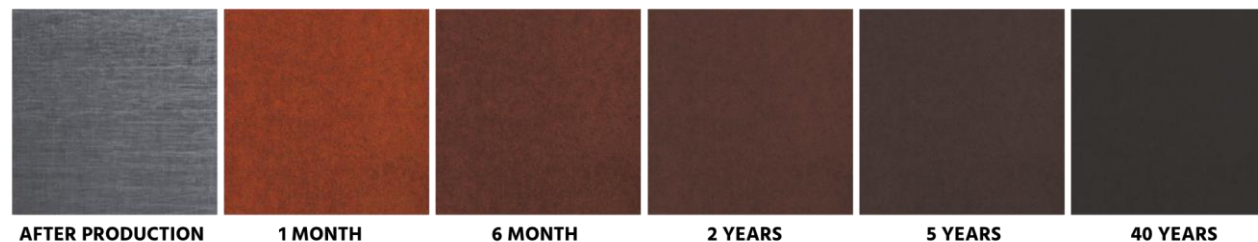

As the surface layer develops over time, the appearance and durability of Corten steel – and any product made from it – is enhanced as a result of weathering.

As a result, every product made from Corten develops a very unique, rustic looking finish.

KUMMIN – Corten Material

Main advantages

- High resistance to corrosion and weather, up to 8 times higher than common carbon steel, which makes it particularly suitable for outdoor use.
- Natural oxidation, which occurs on contact with the air, and forms a protective coat that prevents further rusting. Moreover, this patina gives it a warm brown colour, which varies in tone over the years and depending on the external environment.
- The recycling percentage is close to 100%.

KUMMIN – Corten Material

What are the drawbacks to using Corten Steel?

While it is largely rust-proof, there are inevitably small amounts of rust which tend to pool underneath the installation. It is worth therefore paying attention to locating it above surfaces that don't stain or will be disfigured in any way.

NOTICE!

To keep in mind is that during the first years, the corten steel can discolor the surface on which it stands!
