Cleaning instructions

Stain removal:

If something is spilled on Bubble Carpet, act quickly.

- Remove the excess spillage, always work from the edge of the stain towards the centre
- Use a clean white cloth to dry the stain. Dab it with cold water
- Pat the stain dry with a clean cloth, wiping in the direction of the pile
- Wait until the stained area is completely dry
- Make sure nobody walks on the treated carpet surface for at least the next 24 hours
- Never use soap or detergents which have high chemicals substances

Deep cleaning:

- You should take support from professional carpet care companies for deep cleaning. The carpet care company should be informed that high chemical detergents or hard brushes can harm the fibers
- After cleaning, dry the carpet on the floor quickly. The carpet should not be used wet and also should not be left under direct sunlight

Recommendations

- The carpet should not be beaten during cleaning, it should rather be cleaned using a powerful vacuum cleaner
- Items (such as sofas, tables, etc.) on the carpet can leave traces. To prevent this, the placement of the carpet or objects should be changed at certain intervals
