

OLSSON & JENSEN

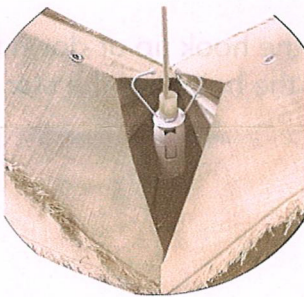

Please read all instructions before assembling the star.

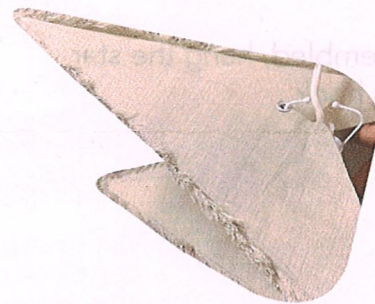

The package contains two items, the star and the electric wiring.

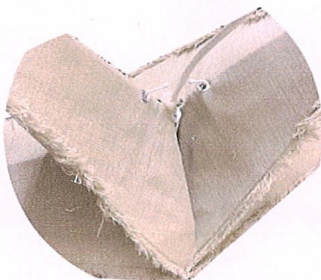

Gently open each leaf of the star properly before inserting the wiring. You may add the bulb at this stage.

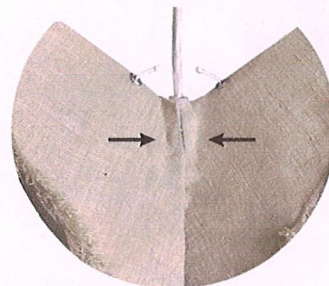

Place the holder facing down in the middle.

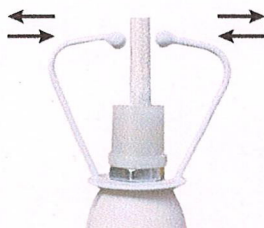

Insert one metal handle through an eyelet.

While holding the holder, insert the second handle through the other eyelet.

Adjust the inner flaps by gently pulling them out to close the gap in the middle.

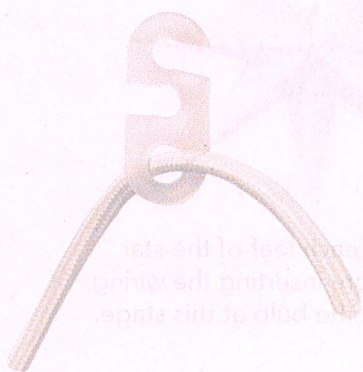

Gently stretch the two handles wider apart if needed for assembling and push it back to close any gap.

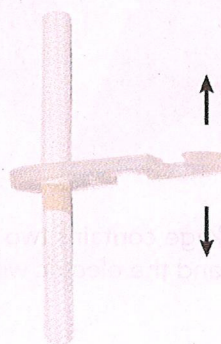

OLSSON & JENSEN

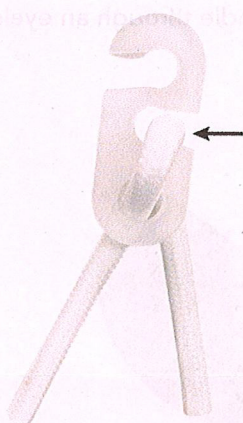

Please read all instructions before assembling the star.

Once assembled, hang the star using this hook.

Move the hook up or down to adjust the height of the star.

Once satisfied with the height, fix it by inserting the cable through the second hole.

Use the upper hook to hang the star.
